

US 59 El Campo North

(From SH 71 to Business 59 north of El Campo)

US 59 El Campo South

(From Business 59 south of El Campo to SH 71)

Fact Sheet

Why are frontage roads needed on US 59?

Currently US 59 in El Campo is not a controlled access, expressway-type road. As traffic increases in the area, accessing the mainlanes of US 59 becomes more difficult. TxDOT is currently studying controlling the access along the US 59 mainlanes and providing frontage roads, so US 59 in El Campo can be safer, and better accommodate growing traffic volumes.

Project Purpose

The purpose of the US 59 project through El Campo is to provide frontage roads and convert the existing lanes of US 59 to a controlled access, expressway-type road that meets Interstate standards.

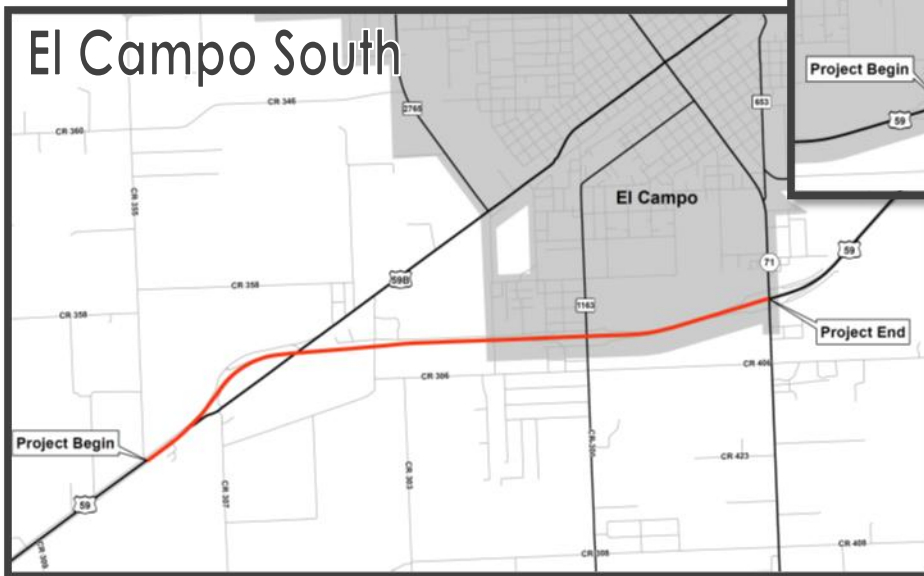

Why Two Projects?

There are two projects currently proposed through El Campo. The El Campo North project extends from SH 71 to Business 59 north of El Campo. The El Campo South project extends from Business 59 south of El Campo to SH 71. In consultation with the El Campo leadership, TxDOT is developing the projects as two in order to maintain different project schedules and allow the South project to be environmentally cleared and constructed first.
